Hiring Manager

Dear HR Manager,

I will be a fresh graduate, majored in Multimedia Design Course at Raffles University in Johor Bahru. While studying, I explored extensive multimedia in various fields, including motion graphics, 3D, VR, and AR. Among these, I have a great interest in 3D graphics and motion graphics. By studying software such as Maya, Houdini, and After Effects, I have strengthened my technical capabilities and learned fundamental techniques for creating engaging content, such as animating, composing, lighting, and storytelling.

Besides, I have studied mathematics, economics, and philosophy which has equipped me with strong logical and critical thinking skills. My vision is to reflect these attributes in creating high-quality, meaningful, and entertaining content through 3D technology. Ultimately, conveying deep and lasting value to people through media.

Currently I am producing my final year project, 2-min full 3D music video based on Verdi's Requiem. The piece reinterprets the Four Horsemen of Revelation and centers on ideological conflicts in modern and their consequences. For the storyboard and concept design, I applied philosophical analysis to actively utilize visual metaphor. Production follows a multimedia workflow including modeling, rigging, animation, lighting, and VFX, and I use Maya, Houdini, ZBrush, Substance 3D Painter, and After Effects. If you are interested, some of the work can be viewed on my portfolio site listed on my resume.

I hope to gain more than just experience in producing multimedia content during my internship period. I wish to learn teamwork and unleash my creativity to create meaningful content.

If you require any documentation or identity verification for the internship position, please contact me at the email or phone number provided in my cover letter and resume. I will verify the details and send the necessary documents via email within two week.

Sincerely,

Na Semin
